

## Implant Restorations From Final Impressions to Delivery

Bryan J. Frantz, D.M.D., M.S.; Fred J. Bonacci, D.M.D.  
Matthew J. Palermo, D.M.D.

This course will present information related to impression techniques for implants (both implant-level and abutment-level). We will discuss restorative options and selection of final abutments/treatment approach. Also covered will be delivery of the final implant crown including techniques for both cement-retained and screw-retained restorations.

### After this course you should be able to:

- Describe the different approaches for making impressions of implants.
- Describe the components needed for taking impressions of implants including their purpose.
- List the sequence for restoring an implant case from the impression through to delivery.
- Describe the technique for cementing an implant restoration.
- Describe the abutment selection options.
- Describe the technique for delivering a screw-retained implant restoration.
